Splash Parks / Water Parks / Theme Parks

Water Splash products are designed and manufactured to meet two basic criteria; fun and safety. Only the finest materials are used in the construction process, to ensure that maximum safeguards are incorporated into every design. To this end, all manufacturing and tooling takes place in-house, and all products conform to or exceed ASTM F1487, ASTM F2461, SS 457, CSA 2614 and EN 1176 standards. Our in-house engineering and manufacturing expertise also provide our customers with another advantage: complete customization, to suit any and all of their needs.

- All metal products are made of 304/304L stainless steel material.
- Nozzles, water openings and sprayers are made of C360 brass material.
- Water Splash provides special tamper-resistant tools. All products are offered with winter caps.
- The painted finish of all equipment is a high-quality, UV-resistant powder coating of oven-cured glossy polyester, with stabilizers and chlorinated water resistance.
- Spray nozzles are recessed, welding marks are invisible (buffed and polished) and equipment is pressure tested for leakage.
- Products comply with the ADA (Americans with Disabilities Act) and CDA (Canadians with Disabilities Act).
